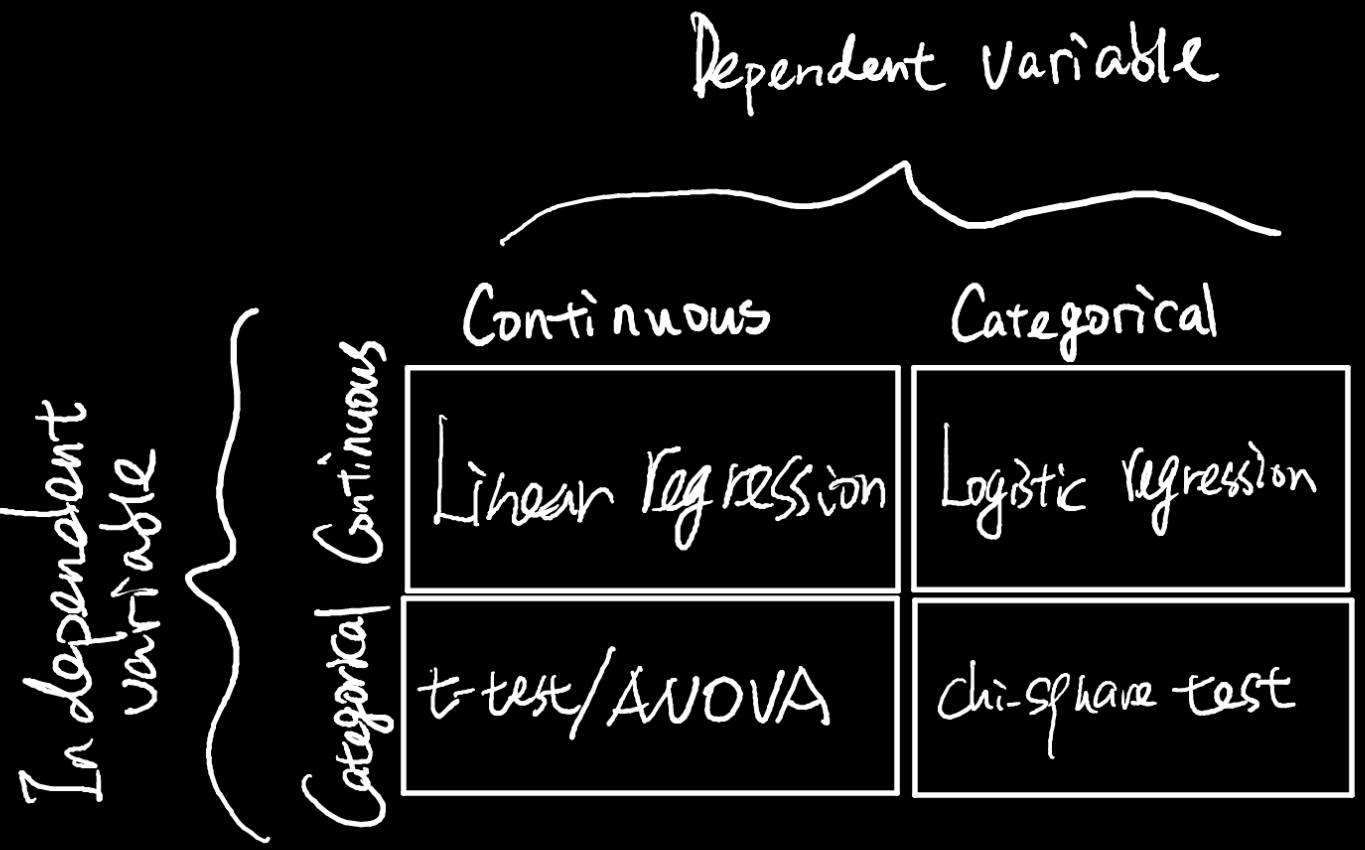
y_{11} ... y_{1m}
y_{21} ... y_{2m}
y_{n1} ... y_{nm}
c_{11} ... c_{1p}
c_{21} ... c_{2p}
c_{n1} ... c_{np}
m
p



Dependent variable
Continuous
Categorical
Independent variable
Categorical
Continuous
Linear regression
Logistic regression
t-test/ANOVA
Chi-square test

Indep. v.s. Dependent

1. Categorical v.s. Continuous

1.1	$p = 1, m = 1,$	One-way ANOVA
1.2	$p = 2, m = 1,$	Two-way ANOVA
1.3	$p \geq 3, m = 1,$	p-way ANOVA
1.4	$p = 1, m \geq 2,$	One-way MANOVA[a]
1.5	$p = 2, m \geq 2,$	Two-way MANOVA
1.6	$p \geq 3, m \geq 2,$	p-way ANOVA

[a] MANOVA refers to the multivariate analysis of variance
ANOVA refers to the univariate analysis of variance.

2. Continuous v.s. Continuous

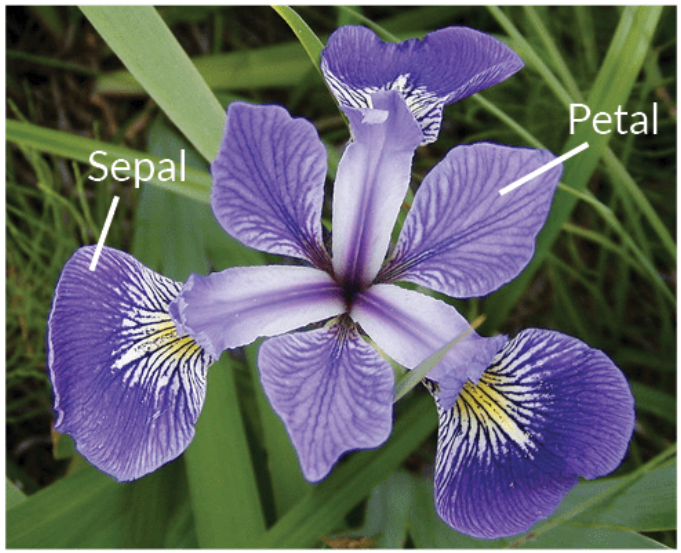
2.1	$m_{ind} = 1, m_{dep} = 1,$	Simple linear regression
2.2	$m_{ind} \geq 2$	Multiple linear regression
2.3	$m_{dep} \geq 2$	Multivariate linear regression

E.g. One example for MANOVA[1].

The Iris Dataset

Collected by Ronald Fisher in 1936

[1] http://www.sthda.com/english/wiki/manova-test-in-r-multivariate-analysis-of-variance



Iris Versicolor

Iris Setosa

Iris Virginica
